The specific problem is: many grammatical errors and poor sentence structure please help improve this article if you can. (December 2017) (Learn how to remove this template message and when) Piano TilesDeveloper (s) is a One Hong Cheetah Mobile Umoni Studio [1] platform (s) iOS, Windows PhoneReleaseMarch 28, 2014 [2] Genre (s) ArcadeMode (s) one piano tile player (known on iOS as piano tile – don't press white tile and on Android as no white tile press) [1][3] is a single-player mobile game launched on March 28, 2014 by Umoni Studio, specifically by creator Hu Wen Zeng. The game contains six modes; Arcade mode; Zen mode; Rush mode; Arcade+ mode (which includes bomb, lightning, plaire and double tiles); and relay mode. [1] In late April 2014, the game was the most downloaded app on both iOS and Android. [3] In early July it was released for Windows Phone. The sequel, Piano Tile 2, was created by Wen Zeng and launched by Cheetah Mobile on August 19, 2015. Play a screenshot of the game of piano tiles in the progress of piano tile is a game where the goal of the player is to tap on the black tiles as the show from the top of the screen while avoiding white. When all the black tiles are exploited, the sound of the piano will be emitted. In quick succession, famous works such as Für Elise and The Poem of Joy are formed. [1] [4] Bluestone Alley, melodies by Congfei Wei, is a piano tile 2-level song is the original composition of Piano Tiles 2, other songs by Congfei wei is Aurora and forest of blocks. If the player taps on the white tiles, the player will lose the game and be signaled by a note outside the melody. [1] Classic mode there is a certain number of tiles that the player must touch to win. The screen moves manually, touching tiles. The player may try to touch these tiles in the least possible time. Put the tile arcade on the screen moving automatically and the player must keep up with the pace. The game continues until one tile is missed between, or white tiles are exploited. It contains a wide variety of variables, of them in a similar mode known as Arcade+ mode. Piano Tiles 2 use only arcade mode in songs with some long tap tiles, double tiles, quick tiles and slide tiles but after 3 stars the speed is constantly increasing and earning crowns and ring song. Zen put there a specific time limit and the player may try to press as many tiles as possible before time runs out. As with classic mode, the screen moves at a rate that is pressed on black tiles. Put rush screen scripts automatically, similar to arcade mode. The speed of scrolling gradually increases and the player is forced to take advantage of the tiles at an ever-increasing pace. The player inevitably loses, at which point the game reveals how many tiles per second the player was able to touch. Piano Tiles 2 is based primarily on rush mode, featuring various songs. Relay mode is similar to zen mode, but the specified time can be reset by tapping tiles. If the player is unable to take advantage of fifty tiles before time runs out, the game ends. The screen moves at the player's pace in the same way that the classic zen mode moves. Arcade + put all the same moving tiles in arcade mode with added additives. • Bomb – tiles with skull and cross bones should not be tapped. If the game ends. • Lightning – the screen goes dark. Then lightning goes on the screen. • Dress up – the tiles are striped black and blue. The same bomb but the tiles increase the speed that you get lighter making the tiles unpreventable obstacle. • Double - all of it will often show 2 tiles next to each other. Many songs in piano tiles 2 and double tiles. Caardas is one of the song has the most consecutive double tiles. • Billayer – all of which are often tiles with 2 horizontal white lines will appear. This tile must be twice. • Fog – all of it will often appear fog on the tiles. • Unstable - the speed of the tiles changes often. • Rotary – all of that often will reverse the game and then change again. • Vibrating – all too often the game will shake. • Cloudy – a row of cloud goes in front of the player. • The speed of the tiles often changes. • Rotary – all of that will often change the tile. The spin-off benefits after the success of the game and its sequel, the game has been copied and its methods several times, most notably by White Tiles 4, which also copied many other game designers.
